MATHEMATICS.

There will be two papers in Mathematics, one paper in Arithmetic and Algebra, and a second paper in Geometry.

The courses shall be as follows :-

- (1) Arithmetic.—The whole of Arithmetic. (The uses of Algebraical symbols and processes shall be permitted.)
- (2) Algebra.—The four simple rules, Fractions, Greatest Common Measure, Least Common Multiple, Factors, Proportion, Simple Equations of one or more unknown quantities with easy problems, Square Root, simple questions on Fractional and Negative Indices, Quadratic Equations of one unknown quantity with easy problems. (3) Geometry.—The course includes both Practical and Theoretical Geometry, and every candidate shall be expected to answer questions in both branches of the subject.

The questions on Practical Geometry shall be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. All figures should be drawn accurately, for which purpose every candidate should provide himself with a graduated scale, a pair of set squares, a protractor, compass and a hard pencil.

The questions on Theoretical Geometry shall consist of Theorems contained in the annexed Schedule B, together with easy extensions and deductions with numerical illustrations. Any proof of a proposition shall be accepted which appears to the examiners to form part of a systematic treatment of the subject; the order in which the theorems are stated in Schedule B is not

imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions shall be permitted.

SCHEDULE A.

Bisections of angles and of straight lines. Construction of perpendiculars to straight lines. Construction of an angle equal to a given angle. Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

Division of straight lines into a given number of equal parts or into parts in any given proportions.

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines.

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle.

Construction of a square equal in area to a given polygon.

SCHEDULE B.

Angles at a Point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.

PARALLEL STRAIGHT LINES.

When a straight line cuts two other straight lines, if

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right angles,

then the two straight lines are parallel; and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

TRIANGLES AND RECTILINEAL FIGURES.

The sum of the angles of a triangle is equal to two right angles.

If the side of a convex polygon are produced in order the sum of the angles so formed is equal to four right angles.

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by these sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.

If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent. If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

AREAS.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

Illustrations and explanations of the geometrical theorems corresponding to the following Algebra indentities:—

$$k (a + b + c + ...) = ka + kb + kc + ...$$

 $(a + b)^2 = a^2 + 2ab + b^2$
 $(a - b)^2 = a^2 - 2ab + b^2$
 $a^2 - b^2 = (a + b)(a - b)$

The square on a side of a triangle is greater than, equal to, or less than, the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right, or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

Loci.

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

THE CIRCLE.

A straight line drawn from the centre of a circle to bisect a chord which is not the diameter is at right angles to the chord; conversely the perpendicular to a chord from the centre bisects the chord.

There is one circle, and one only, which passes through three given points not in a straight line.

In equal circles (or in the same circle) (i) if two arcs subtend equal angles at the centres, they are equal; (ii) conversely, if two arcs are equal, they subtend equal angles at the centres.

In equal circles (or in the same circle) (i) if two chords are equal, they cut off equal arcs; (ii) conversely, if two arcs are equal the chords of the arcs are equal.

Equal chords in a circle are equidistant from the centre; and the converse.

The tangents at any point of a circle and the radius through the point are perpendicular to one another.

If two circles touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal; and, if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The angle in a semi-circle is a right angle, the angle in a segment greater than a semi-circle is less than a right angle, and the angle in a segment less than a semi-circle is greater than a right angle.

The opposite angles of any quadrilateral inscribed in a

circle are supplementary; and the converse.

If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

PROPORTION: SIMILAR TRIANGLES.

If a straight line is drawn parallel to one side of a triangle, the other two sides are divided proportionally; and the converse.

If two triangles are equiangular, their corresponding sides are proportional; and the converse.

If two triangles have one angle of the one equal to one angle of the other and the sides about these equal angles proportional, the triangles are similar.

The internal bisector of an angle of a triangle divides the opposite sides internally in the ratio of the sides containing the angle, and likewise the external bisector externally.

The ratio of the areas of similar triangles is equal to the ratio of the squares on corresponding sides.

STATE SCHOLARSHIPS TENABLE AT OXFORD OR CAMBRIDGE BY NATIVES OF INDIA.*

RESOLUTION.

In Home Department Resolution No. 360, dated 30th June, 1868, a scheme was promulgated for the creation of a certain number of Government scholarships tenable in England by Natives of India. It was explained that the object of creating the scholarships was to encourage Natives of India to resort more freely to England for the purpose of perfecting their education and of studying for the various learned professions or for the Civil and other services in India. In a subsequent Resolution, dated 18th January, 1870, the circumstances were set forth under which it had been determined to hold this scheme in abeyance.

^{*} These scholarships were instituted by Home Department Resolution No. $\frac{1}{45.57}$, dated the 12th February, 1886, No. $\frac{9}{269-81}$, dated the 23rd August, 1886, and No. $\frac{3}{38.49}$, dated 30th January, 1885.

For some time past the Government of India has been in communication with Her Majesty's Secretary of State regarding the re-establishment of a limited number of Government scholarships tenable in England by Natives of India, and the Governor-General in Council is glad to be able now to announce that it has been decided to bring into immediate operation a scheme which, it is hoped, will have the effect of offering a certain measure of encouragement to the youths of this country to proceed to England for the purpose of completing their education either at the University of Oxford or at the University of Cambridge.

2. Six scholarships, the cost of which will be defrayed by the Government of India, will be at once established, tenable in England by persons who are Natives of India within the meaning of Section 6 of the Statute 33 Vic., Cap. 3. The scholarships will be placed at the disposal of the Universities of Calcutta, Bombay, Madras and the Punjab in rotation,* one scholarship being given to each of the first two Universities during the present year (1886), and one scholarship to each of the last two during next year (1887). In allotting the scholarships in future years the same order will be observed.

^{*}Under Resolution, dated 17th October, 1888, consequent upon the establishment of the Allahabad University, the Government of India has decided "that, with effect from the year 1889, each of the Universities concerned shall participate in the scholarships in the following sequence":—

Allahabad Madras	}	1899	Calcutta Bombay }	1903	Madras Punjab	} 1907
Punjab Calcutta	}	1900	Allahabad } Madras	1904	Calcutta Bombay] 1908
Bombay Allahabad	}	1901	Punjab Calcutta: }	1905	Allahabad Madras	} 1909
Madras Punjab	1	19 02	Bombay Allahabad }	1906	Punjab Calcutta	} 1910

- 3. Each scholarship will entitle the holder to an allowance, not exceeding £200 per annum, payable from the date of his arrival in England, and will be tenable for three years. No candidate should be more than 21 years of age. Each candidate to whom a scholarship may be awarded will be required to proceed to England within a reasonable period from the date of his selection, and to reside there for a period of three years, unless compelled to return sooner by ill-health.
 - 4. Each scholar will be entitled to receive a sum of £100* for passage-money, and a similar sum will be payable within one month before his actual return to India if he should complete the full period of three years' residence, or be compelled by sickness to return before the completion of that period.
 - 5. It is intended to reserve to the scholars the power of selecting, once for all, the course of study to be followed by them in England. Each scholar will be required to bind himself by written engagement to submit to such regulations as may, from time to time, be framed by Her Majesty's Secretary of State for the guidance of scholars.
 - 6. If any scholar, not being disabled by sickness, fails to complete a residence of three years in England or is guilty of gross misconduct or disregard of the orders of Her Majesty's Secretary of State, he will, at the discretion of the Secretary of State, forfeit his scholarship and further be liable to refund the sum drawn by him as passage-money.
 - 7. Scholars will be expected to reach England before the opening of the October term at the University of Oxford or Cambridge, to one of which University they will be required to proceed.

^{*} By Resolution of Government of India, dated 2nd February, 1895, it is notified that, in future, Second Class accommodation only by Railway in India, and on the sea-toyage to London, will be allowed to persons selected to hold State Scholarships tenable in England.

RULES FOR THE SELECTION OF CANDIDATES FOR THE STATE SCHOLARSHIPS TENABLE IN ENGLAND BY NATIVES OF INDIA.

- 1. The Syndicate shall in the year in which a State Scholarship tenable in England is placed at the disposal of the University, and as soon as may be reasonably practicable after the results of the Examination in such year for the Degree of B.A. have been ascertained by the Syndicate, and at any other time or times as occasion may arise, select for the scholarship a person who is qualified in the manner specified by Rule 2.

- 3. Any person desirous of being selected by the Syndicate should, at as early a date as possible in the year in which the selection may be made, forward to the Registrar of the University a signed notice to that effect, stating that, if selected, he will comply with such regulations relating to the scholarships and the holders thereof as the Secretary of State for India may at any time make, and shall forward to the Registrar such certificates as to his qualifications as he may have been able to obtain.

- 7. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete a residence of three years in England according to the terms and conditions approved by the Secretary of State under Rule 3, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

CAMBRIDGE UNIVERSITY.

Report of the Council of the Senate on the Affiliation of the University of Allahabad; confirmed by the Senate on 21st November, 1895, as per letter dated Cambridge, 29th June, 1896.

21st October, 1895.

THE COUNCIL OF THE SENATE beg leave to report to the SENATE as follow:—

In course of last year the Vice-Chancellor received from the Registrar of the University of Allahabad an application for the affiliation of that University to the University of Cambridge.

The Council have found that the constitution and scheme of examinations of the University of Allahabad closely resemble those of the University of Calcutta, and that the two Universities recognise each other on equal terms, the Examinations and degrees of the one being accepted as equivalent by the other. The Council therefore decided that they would be prepared to recommend to the Senate that the application for affiliation be granted on terms similar to those approved by Grace I of 5th March, 1895, for the University of Calcutta; and they communicated with the authorities of the University of Allahabad to this effect. They have now received an acceptance on the part of that University of the terms proposed.

The Council accordingly recommend —

1. That the University of Allahabad be adopted as an institution affiliated to the University of Cambridge,

2. That any matriculated student of the University of Allahabad be entitled to be admitted to the privileges of affiliation who has (1) in accordance with the regulations of that University studied for not less than two years at one or more Institutions for the education of adult students affiliated in Arts up to the B.A. standard; (2) passed the Entrance Examination, and also passed in the First Division in the Intermediate Examination in Arts or in the First or Second Division in the Examination for the Degree of Bachelor of Arts of that University: provided that in one of these Examinations or in some other Examination held by that University he has satisfied the Examiners in Greek, Latin, Sanskrit, Arabic or Persian.

ST. JOHN'S COLLEGE, AGRA.

Affiliated in Arts, 1888, 1890, 1893; in Law, 1891.

This College was established in 1850, and its foundation was chiefly due to the efforts of an influential body of Civilians and Military Officers, who were at that time members of the Local Committee of the Church Missionary Society; the Hon'ble J. R. Colvin, Lieutenant-Governor of the N.-W.P., being the Patron, and Sir William Muir, the President.

Their desire was to found a College for the education of the higher classes of Indian youths upon strictly Christian principles, as they felt that such an institution was greatly needed in order to create a higher moral and spiritual tone among those classes.

In more recent years, owing to the rapid growth of the Indian Christian community, the object of the institution has become somewhat changed. Whilst welcoming, as before, all Hindus and Muhammadans desirous of receiving a liberal education under Christian influences, the College has become recognised more specially as an institution where the education of Indian Christian youth is made a matter of primary importance. The following High Schools of the Church Missionary Society are affiliated to St. John's College, viz:—

1. Robert Money Institution, Bombay.
2. St. John's Collegiate School, Agra.
3. Church Mission High School, Azamgarh.
4. " " Basti.
5. " " Jaunpur.
6. " " Jabalpur.
7. " " Lucknow.
8. " " " Meerut.
9. Jai Narain's College, Benares.

The Christian students of these schools are eligible for various scholarships and other concessions, according to merit and circumstances.

The buildings and conveniences have been considerably increased in recent years. They consist of the College; the School; Hostels for Christians and Hindus; a College-chapel; a swimming bath, etc. The College consist of three sections, viz:—

1.—An unaided College Department, with classes in Arts, Science, and Law.

This School was founded by the liberality of Mrs. Philander Smith of Oak Park, Qes., U. S. A., as a memorial

to her husband, a noble spirited Christian layman. It was opened in Mussocrie in 1885 under the name of the Philander Smith Institute, and under the auspices of the Methodist Episcopal Church in India.

In January, 1905, the Institute was amalgamated, with the Oak Openings High School, Naini Tal, a school also under the auspices of the Methodist Episcopal Church, the name changed to the Philander Smith College, the entire property of both former schools founded for the new school, and the new school established on the more commodious and desirable site in Naini Tal.

This School now occupies one of the most magnificent school sites in all India—a wooded estate of about 40 acres, over 7,500 feet above sea level. The plant itself is being rapidly extended and equipped. Re-affiliation to the Intermediate Arts was granted in 1905.

KAYASTHA PATHSHALA, ALLAHABAD.

Affiliated in Arts, 1895.

The Kayastha Pathshala was founded in 1872 by the late Munshi Kali Prasad, of the Lucknow Bar. In 1878 it was raised to the Middle English Standard and in 1883 to the Entrance Standard of the Calcutta University. In 1894 it was included by the Allahabad University in the list of schools recognized for the purposes of the School Final-Examination. In 1895 it was affiliated to the same University up to the Intermediate Examination Standard. The first year class was opened in July 1895, and the second year in July 1896.

The institution was registered on August 2nd, 1893, under Act XXI of 1860, the chief controlling authority being the President for the time being, assisted by a Committee of Management. Its income is derived from an endowment of property made mainly by the late Munshi Kali Prasad and partly by others which was estimated to be worth Rs. 5,10,583-6-11 on the 30th of June 1894.

The institution is divided into College and School Departments, the former under the immediate charge and the latter under the superintendence of the Principal.

In the College Department the scale of fees charged ordinarily is Rs. 3 per mensem, payable during ten months in the session. There are 20 free scholarships, ten in the first year and ten in the second year class, for poor students who have passed the Entrance or the School Final-Examination in the first division. In the School Department the scale of fees is proportionate to the income of guardians of boys, Chitra-qupta Vanshi Kayasthas paving lower fees than students belonging to other castes. There is a large number of free scholars in both College and School Departments, belonging mainly to the Kayastha community. Kayastha students, moreover, receive monthly scholarships and aid, the total amount spent yearly for this purpose exceeding Rs. 2,500. There is a Boarding-house for Kayastha students, where the monthly fee charged is Rs. 7 per head.
